PROFESSIONAL SUMMARY

Full Stack JavaScript Developer with hands-on experience building and deploying 4 production-ready web applications using React.js, Node.js, Express.js, MongoDB, Redux Toolkit, and Redis. Skilled in RESTful API design, JWT authentication, real-time AI integration (MediaPipe), Redis caching, and responsive UI — seeking a full-stack or frontend role focused on scalable, user-facing products.

TECHNICAL SKILLS

Frontend:	React.js, JavaScript (ES6+), HTML5, CSS3, SCSS, Tailwind CSS, GSAP, Framer Motion
State Management:	Redux Toolkit, Context API
Backend:	Node.js, Express.js, REST API Design, JWT Authentication, bcryptjs, MVC Architecture
Databases:	MongoDB, Redis, PostgreSQL (learning)
Tools:	Git, GitHub, Postman, npm, VS Code, Vercel, Render
Concepts:	Responsive Design, Component Architecture, OOP, Data Structures & Algorithms

WORK EXPERIENCE

Web Developer Intern — InAmigos Foundation

May 2026

- Contributed to frontend web development tasks and feature implementation within a team-based environment.
- Completed assigned development work across the internship duration; awarded Internship Completion Certificate.

Full Stack Developer — Self-Directed Projects

2025 – Present

- Independently designed, developed, and deployed 4 full-stack web applications — UI/UX, REST API design, database modelling, JWT authentication, and cloud deployment on Vercel and Render using Git version control.

PROJECTS

Affectra — AI Emotion-Based Recommendation Platform

affectra-koea.onrender.com

React.js · Redux Toolkit · Node.js · Express.js · MongoDB · Redis · JWT · MediaPipe · Recharts · Tailwind CSS

- Engineered real-time AI platform using MediaPipe Face Landmarker to detect 6+ facial emotion states and automatically serve personalised song and meme recommendations — eliminating manual content discovery.
- Designed full REST API backend: emotion-to-content mapping engine, JWT auth with Redis-based token blacklisting for instant session invalidation; Redis caching cut repeated MongoDB queries by ~60%.
- Built Recharts analytics dashboard tracking emotion trends across 5+ categories; structured global state using Redux Toolkit slices for auth, emotion, recommendations, and analytics.

FitNova — Gym Management System

summer-internship-hackathon-2026-te.vercel.app

React.js · Node.js · Express.js · MongoDB · Tailwind CSS · JWT · html5-qrcode

- Built full-stack gym management system with 2 role-based access levels (User, Admin), protected dashboards, and dynamic route guarding via React Router.
- Eliminated manual attendance register using QR code scanning (html5-qrcode) with automatic timestamped entry/exit logging — achieving 100% digital attendance records.
- Secured all API endpoints with JWT (HTTP-only cookies) and bcryptjs password hashing; deployed frontend on Vercel, backend on Render with environment-based configuration.

CineVerse — Full Stack Movie Streaming Platform

cineverse-zc5r.onrender.com

React.js · Redux Toolkit · Node.js · Express.js · MongoDB · SCSS · JWT

- Built a Netflix-inspired streaming platform with JWT authentication, protected routes, and user-specific content management including watchlist and recently watched history.
- Developed RESTful APIs and MongoDB data models for movies, users, watchlists, and viewing history; implemented advanced search, movie discovery, and trailer viewing workflow.
- Designed responsive glassmorphism UI with infinite scrolling and lazy loading; managed centralised app state using Redux Toolkit for scalable frontend architecture.

EDUCATION

Bachelor of Science in Information Technology — Ranchi University

Expected 2028

Intermediate (Science) — Marwari College, Ranchi

2022 – 2024

CERTIFICATIONS

Responsive Web Design — freeCodeCamp (2026) · Generative AI and Prompt Engineering — IBM (2025) · Generative AI for All — Microsoft (2025)
