PROFESSIONAL SUMMARY

Frontend developer with experience in React.js, JavaScript, and full-stack development. Built a macOS-inspired web interface with draggable windows and a functional in-browser terminal. Developed a MERN stack application with JWT authentication and QR-based attendance tracking. Focused on frontend engineering with an understanding of backend integration.

TECHNICAL SKILLS

Frontend:	React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, SCSS, Redux Toolkit
Libraries & Tools:	GSAP, Git, GitHub, Postman, npm
Backend:	Node.js, Express.js, MongoDB, JWT, bcryptjs, REST APIs
Concepts:	Responsive Design, Component Architecture, Authentication, UI/UX Principles

PROJECTS

FitNova — Gym Management System

[Live Demo](#)

Tech: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT

- Built a full-stack gym management system with separate user and admin roles using the MERN stack.
- Implemented JWT authentication with HTTP-only cookies for secure user and admin access.
- Added QR-based attendance tracking with automatic entry and exit logging using html5-qrcode.
- Secured backend APIs with bcryptjs password hashing and protected routes.
- Built admin features including member management, gym access control, and attendance monitoring.

FinVision — Expense Tracker

[Live Demo](#)

Tech: React.js (Vite), Tailwind CSS, Tesseract.js, Recharts, Context API, Framer Motion

- Built a receipt scanner using Tesseract.js that extracts total amount, date, and shop name from uploaded bill photos via client-side OCR.
- Developed a data dashboard using Recharts — pie charts for category-wise spending and area charts for monthly trends.
- Added budget limit alerts that trigger when user spending reaches a defined threshold.
- Built expense categorization (Food, Travel, Bills) with search, filter, and edit features managed via Context API.

macOS Web Interface Clone

[Live Demo](#)

Tech: React.js, GSAP, CSS3

- Built a macOS-inspired web interface in React.js with draggable and resizable windows.
- Developed app components — Notes (with syntax highlighting), Music Player, and GitHub Viewer — each with independent state.
- Added an in-browser terminal with functional commands: mkdir, rmdir, cd, ls, and app launchers.
- Used GSAP for animations and view transitions.

EDUCATION

Bachelor of Information Technology

Ranchi University (Pursuing)

Intermediate (Science) — 2022–2024

Marwari College, Ranchi

CERTIFICATIONS

- **Responsive Web Design** — freeCodeCamp (2026)
- **Generative AI and Prompt Engineering** — IBM (2025)
- **Generative AI for All** — Microsoft (2025)
