## PROFESSIONAL SUMMARY

Frontend developer with experience in React.js, JavaScript, and full-stack MERN development. Built an AI-powered emotion detection platform using MediaPipe and Redux Toolkit. Developed production-ready applications with JWT authentication, Redis caching, and REST APIs. Focused on component-driven frontend development with strong backend integration skills.

## TECHNICAL SKILLS

|                  |                                                                             |
|------------------|-----------------------------------------------------------------------------|
| <b>Frontend:</b> | React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, SCSS, Redux Toolkit |
| <b>Tools:</b>    | GSAP, Git, GitHub, Postman, npm, Redis                                      |
| <b>Backend:</b>  | Node.js, Express.js, MongoDB, JWT, bcryptjs, REST APIs                      |
| <b>Concepts:</b> | Responsive Design, Component Architecture, Authentication, UI/UX Principles |

## PROJECTS

### Affectra — AI Emotion-Based Recommendation Platform

[Live Demo](#)

Tech: React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Redis, JWT, MediaPipe, Recharts, Tailwind CSS

- Built an AI-powered platform that detects user emotions in real time using MediaPipe Face Landmarker and recommends personalized songs and memes based on detected expressions.
- Developed the complete backend including REST APIs, emotion-driven recommendation engine, and user authentication using Node.js, Express.js, and MongoDB.
- Implemented JWT authentication with Redis-based token blacklisting for secure logout handling.
- Built an analytics dashboard using Recharts to visualize emotion history and behavioral trends.
- Managed application-wide state using Redux Toolkit and built a responsive UI with Tailwind CSS.

### FitNova — Gym Management System

[Live Demo](#)

Tech: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT

- Built a full-stack gym management system with separate user and admin roles using the MERN stack.
- Implemented JWT authentication with HTTP-only cookies for secure user and admin access.
- Added QR-based attendance tracking with automatic entry and exit logging using html5-qrcode.
- Secured backend APIs with bcryptjs password hashing and protected routes.

### FinVision — Expense Tracker

[Live Demo](#)

Tech: React.js (Vite), Tailwind CSS, Tesseract.js, Recharts, Context API, Framer Motion

- Built a receipt scanner using Tesseract.js that extracts total amount, date, and shop name from uploaded bill photos via client-side OCR.
- Developed a data dashboard using Recharts — pie charts for category-wise spending and area charts for monthly trends.
- Built expense categorization (Food, Travel, Bills) with search, filter, and edit features managed via Context API.

## EDUCATION

### Bachelor of Information Technology

Ranchi University (Pursuing)

### Intermediate (Science) — 2022–2024

Marwari College, Ranchi

## CERTIFICATIONS

- **Responsive Web Design** — freeCodeCamp (2026)
- **Generative AI and Prompt Engineering** — IBM (2025)
- **Generative AI for All** — Microsoft (2025)
